Bilingual — English & French

PROFESSIONAL EXPERIENCE

LITTLE GUY GAMES

Lead UI/UX Designer

Project: Home Run Derby VR & Wings of Wanitu

Nov 2021 – Aug 2025

Workflow Focus: UI/UX Design & Player Experience

- Player Flow & HUD Architecture**
Spearheaded end-to-end UI Visual Architecture, Player Flows, and HUD layouts for Home Run Derby VR on Meta Quest, ensuring intuitive navigation and clear in-game feedback.
- Prototyping & Iteration**
Developed low and high-fidelity prototypes to validate interaction patterns and player journeys before engine implementation.
- Technical UI Implementation**
Directly managed UI prefabs, asset slicing, and layout engine integration in Unreal Engine 5 (UMG) while polishing transitions and texture atlasing for memory efficiency. Used AI-assisted workflows (Claude + MCP) to accelerate rapid prototyping in Figma and speed up UE5 implementation, applied as a productivity accelerator, not a design crutch.
- Game Design Systems**
Built and maintained modular UI component libraries ensuring visual cohesion and scalability across multiple game projects.
- Accessibility & Inclusive Design**
Applied accessibility best practices including adaptive control layouts and inclusive UI feedback systems to welcome players of all skill levels.
- Interaction & Feedback Design**
Defined interaction patterns and visual feedback loops ensuring UI aesthetics remained cohesive with the game world through rapid iteration.
- Version Control & Collaboration**
Managed UI source files and design assets using Git / GitHub for version control — enabling clean branching, rollback, and cross-disciplinary collaboration with development teams.

COSMIC GAMES STUDIO

Lead Concept Artist

Project: STARQUEST

Oct 2019 – Nov 2020

Workflow Focus: Visual Development & Hero Illustration

- Concept Art Pipeline**
Supported senior leadership in defining the visual identity for Starquest through high-fidelity concept art and UI asset polish.
- Final Illustration**
Produced hero-level promotional illustrations and marketing assets, maintaining brand consistency across external platforms.
- 3D Concept Pipeline**
Engineered environment sketches and texture sets using PBR workflows to optimize 2D assets for seamless 3D engine implementation.

TELUS DIGITAL

UI/UX Designer

Jan 2019 – Apr 2019

Workflow Focus: Wireframing & Design Systems

- Wireframing & Prototyping**
Designed high-fidelity mockups and interactive prototypes for digital ecosystems, focusing on scalable information architecture.
- Design Systems & Component Libraries**
Created and maintained comprehensive UI component libraries and design systems to ensure visual cohesion across all digital product touchpoints.
- Accessibility & Inclusive Design**
Applied accessibility standards to ensure interfaces were usable across diverse user needs and assistive technologies.

EDUCATION

Bachelor of Design in Illustration

OCAD University

2015 – 2020

CERTIFICATIONS

User Experience in Game Design

Epic Games / Coursera

May 2026

User Interface in Game Design

Epic Games / Coursera

May 2026

LANGUAGES

Fluent in English & French

SKILLS

UX Skills

- Information Architecture
- Player Flow & Navigation Design
- Wireframing
- Low-Fidelity Prototyping
- High-Fidelity Prototyping
- User Research & Playtesting
- Empathy Mapping
- Player Personas
- User Stories & Player Journeys
- Competitive Game Audits
- Usability Testing
- Game Loop Design
- Micro-Interaction & Per-Second Goal Design
- Mid-Range Goal Structuring
- Player Progression & Retention Design
- Long-Term Engagement & Motivation Design
- Difficulty Scaling & Player Onboarding
- Inclusive Game Design

UI Skills

- Game Design Systems
- Modular UI Component Libraries
- HUD & In-Game Interface Design
- Visual Design & UI Aesthetics
- Interaction & Feedback Design
- Accessibility & Inclusive UI Design
- Adaptive Controls & Key Binding UX
- Assistive Technology Awareness
- Dynamic UI Feedback

Software

- Figma
- Photoshop
- Unreal Engine 5 (UMG)
- GitHub
